

***FOR CERTAIN CALM
DURING THE STORM***

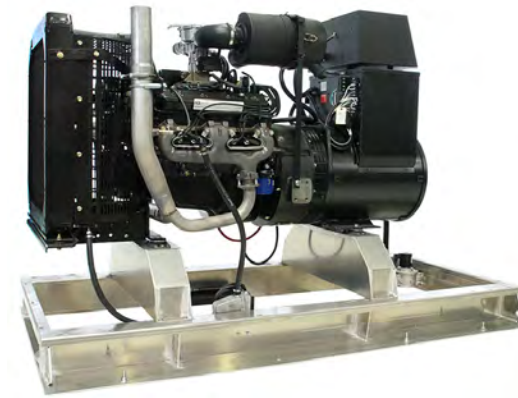

Stateline Power Corp is located in the heart of agricultural America. For nearly 20 years, we have walked countless farms — boots on the ground — and shaken hands with those who know the business of agriculture.

We know how important it has become to have consistent access to electrical power in this industry. Every day of the year, your livestock has to be kept healthy and warm. Your machinery has to keep running. Your irrigation and pump systems have to remain active. To have down time due to a power outage can mean loss of productivity, loss of product and loss of profit.

To protect your hard-earned investment, Stateline Power Corp offers numerous products that guard against power loss, geared specifically for your agricultural needs. Strong, reliable and hard-working, a Stateline Generator is insurance in your sustained success.

Stateline offers a variety of stationary and mobile power generation products that are geared specifically for the hard work and tough environmental factors that are present daily in the agricultural industry. The products featured on this page are just a few of the Stateline gen sets that have been placed in agricultural uses throughout the country.
